MEMORANDUM FOR: [REDACTED]  
Information Handling Systems Architect

FROM: [REDACTED]  
Chairman, Information Handling Committee

SUBJECT: IC Telecommunications Baseline

25X1

Commo

25X1

1. Attached please find a copy of the IC Telecommunications Baseline study with the exception of Section IV, CCP Telecommunications, which is not in print at this time. This study was started in August 1980 and is now being distributed to the Community. Based upon available documentation, a data call, and field interviews, the document and an associated automated data base were compiled. We have found that the automated data base has been useful in the Community in cross-referencing assets and capabilities. In addition to documenting the Community's telecommunications assets, the study also addresses trends and future technology and problems and issues for in-depth post-study analysis.

2. This document can be used as reference material for technical, program, and budget planning within the Community. The data base is available at CIA for Community access, as required. We would appreciate receiving your comments regarding this document and any suggestions for modifications.

3. Please contact [REDACTED] of my staff [REDACTED] for any additional copies.
